Ms. Susan Vari
President, Eagles Fly for Leukemia

Dear Ms. Vari:

Just a note to express my gratitude once again, and to let you know just how critical the partnership of the EFL organization with my research team has been in propelling our laboratory efforts using zebrafish to investigate and discover better ways to outsmart the dreaded high risk forms of pediatric leukemias as my life-long mission as a clinician scientist. As always the EFL Golf event proved such a vital annual tradition to combating this disease and we were honored to be with all of you! Please know that the EFL support is continuing to enable very important progress in advancing our basic understanding of the deadly form of leukemia afflicting infants using zebrafish, and that this research holds promise to find avenues to better treat and possibly prevent this disease.

I continue to stand in awe of the enormous impact you are making in inspiring others to help us conquer this most stubborn form of leukemia in a most vulnerable pediatric population. Once again I thank you on behalf of my entire team!

Sincerely,

Carolyn A. Felix, MD
Professor of Pediatrics
